- See Version Details And New Features.

CONNECTION INSTRUCTIONS:

A. For USB Cable Connection

(USB-C cable connected to device)

Necessary adapters – Lightning, USB-C, USB-A to USB-C/Lightning)

Connect the cable:

First, connect a USB-C or Lightning cable (with the appropriate adapter) from your mobile device to the keyboard (USB device port).

Launch the app:

Once the cable is connected, open the app. Go to the “Device Connect” dropdown.

Select your device:

In the dropdown, you will see the connected device. Select it from the list.

The app will be ready to use and responsive immediately.

No additional setup is needed on either the app or the keyboard.

B. For Bluetooth Connection

(Yamaha BT-01 Bluetooth adapter)

What you need:

You need a Yamaha BT-01 (or BD-01) Bluetooth adapter plugged into your keyboard.

Enable Bluetooth MIDI:

Install and open the “midimitt” app (or a similar Bluetooth MIDI utility) on your device.

Pair the device:

In midimitt, search for available Bluetooth MIDI devices. When the Yamaha BT-01 is plugged into the keyboard, it should appear in the list.

Select it to establish the connection.

Connect in the app:

Open the Scaler app, go to the “Device Connect” dropdown, and select the Yamaha BT-01 from the list of available devices.

The app will immediately connect and is ready to use.

No further configuration is needed on the app or the keyboard.

Note:

The operation of the Scaler app does not require additional setup either in the app or on your keyboard – just connect and play!
